PROFILE SUMMARY

Mechanical Engineer (Major GPA 3.76, Great Distinction) transitioning into Applied AI and Machine Learning. Over the past three years, I have built a strong foundation in machine learning, deep learning, and generative AI through 15+ certifications from DeepLearning.AI, AWS, and Udacity including Andrew Ng's full ML and Deep Learning Specializations.

Proficient in Python-based ML development (Scikit-learn, TensorFlow, Pandas, NumPy), with hands on experience building end to end models for fraud detection, churn prediction, and IoT-integrated intelligent systems. Experienced with AI workflow automation tools including n8n and Zapier, and comfortable working across data pipelines, model evaluation, and applied prototyping.

I bring an engineering mindset to AI problems structured, systems oriented, and focused on building things that work in the real world. Currently seeking a structured applied AI environment where I can contribute, grow, and build meaningful systems.

PROFESSIONAL EXPERIENCE

Office Engineer

Twinkle Technology Group PLC

09/2025 – 01/2026
Ethiopia

- **AI Systems Development:** Engineered logic-driven decision systems using Python and LLM-assisted prototyping to automate project workflows.
- **Digital Transformation:** Migrated manual tracking processes into a semi-automated digital ecosystem, enhancing operational speed and accuracy.
- **Infrastructure Management:** Oversaw company servers and backend stability for web platforms.

Machine Learning (AI) Intern

Codsoft

09/2024 – 10/2024
Remote

- **Full-Cycle Model Deployment:** Developed and deployed three comprehensive ML projects using Python libraries for data preprocessing and regression tasks.
- **Algorithm Tuning:** Utilized statistical methods, including cross-validation and confusion matrix analysis, to optimize model performance for predictive analytics.
- **Data Insight:** Transformed raw datasets into actionable insights via complex data visualization and exploratory analysis.

Industrial Practitioner & Intern

Heineken Ethiopia (Kilinto Brewery)

01/2026 – 06/2026
Harar, Ethiopia

- **Systems:** Integrated mechanical hardware with **PLC automation** and industrial sensors on high-speed lines.
- **Diagnostics:** Troubleshooting automated packaging machinery to minimize downtime and stabilize production flow

Intern

FDRE Military Maintenance Office - Light Vehicle Division (MeTeC)

06/2024 – 08/2024
Ethiopia

- **Diagnostics:** Conducted systematic troubleshooting and repair of light military vehicle systems in a high-discipline environment.
- **Reliability:** Ensured fleet operational readiness through strict adherence to procedural workflows and preventive maintenance protocols.

EDUCATION

BSc in Mechanical Engineering

Adama Science and Technology University

21/06/2025
Adama, Ethiopia

- CGPA: 3.58 | Major GPA: 3.76

BA in Marketing Management (In Progress)

Harambee University

01/07/2026
Ethiopia

- Current CGPA: 3.70

SKILLS & TOOLS

Software & Languages

- **Machine Learning & AI:** Supervised/Unsupervised Learning, Deep Neural Networks (CNNs), Generative AI, Large Language Models (LLMs), Prompt Engineering, and Natural Language Processing (NLP).
- **Programming & Data:** Python (Pandas, Scikit-learn, NumPy, Matplotlib), C++, MATLAB, SQL, and Advanced Excel VBA.
- **Automation & Systems:** AI Workflow Automation (n8n, Zapier), PLC Logic, SCADA, IoT Architecture (Arduino), and Sensor Integration.
- **Engineering & Design:** SolidWorks, CATIA, AutoCAD, and System Diagnostics/Repair.

SPECIALIZED CERTIFICATIONS

Generative AI with Large Language Models

Coursera & AWS

Completed a hands-on course on building and applying generative AI systems using large language models, including prompt engineering and real-world AI applications.

Deep Learning Specialization

DeepLearning.AI

Completed a comprehensive program covering neural networks, CNNs, sequence models, and optimization techniques for building advanced AI systems.

Machine Learning Specialization

DeepLearning.AI

Gained practical experience in supervised and unsupervised learning, including regression, classification, and model evaluation using real-world datasets.

Artificial Intelligence Fundamentals

Udacity

Built foundational knowledge in AI concepts, including problem-solving, search algorithms, and intelligent systems.

Data Analysis Fundamentals

Udacity

Developed skills in data processing, visualization, and analysis using modern data tools and techniques.

Python Programming (University of Michigan Series)

Coursera

Acquired strong foundations in Python, including data structures, web data access, and problem-solving through practical exercises.

PROJECTS

Smart Irrigation & IoT Control System

- Engineered an end-to-end IoT system using C++ and Python, replacing traditional threshold-based logic with a custom **Machine Learning model (AI)**.
- Developed sensor-to-cloud data pipelines to automate irrigation, significantly improving water efficiency and predictive yield accuracy.

Enterprise Automation & Logic Systems

- Digitized core operations by building custom modules for HR compensation, BoQ management, and tender lifecycles.
- Designed quantitative models and real-time dashboards to eliminate decision bias and automate cost-tracking workflows with high precision.

Machine Learning & Predictive Analytics

- **Credit Card Fraud Detection:** Built a classification model to identify high-risk transactions.
- **Customer Churn Prediction:** Developed a predictive engine to analyze behavior and reduce attrition.
- **Movie Genre Classification:** Implemented NLP techniques for automated content tagging.
